July 2026 Hawai'i Vacation Rental Performance Report

Vacation rentals across Hawai'i reported increases in occupancy rate, demand and average daily rate (ADR) with lower supply in July 2026 when compared to July 2025.

In July 2026, the total monthly supply of statewide vacation rentals was 859,300 unit nights (-6.8%) and monthly demand was 471,900 unit nights (+2.3%) (Figure 1). This combination resulted in an average monthly unit occupancy of 54.9 percent (+4.9 percentage points) for July. Occupancy for Hawai'i's hotels was 81.8 percent in July 2026.

The ADR for vacation rental units statewide in July was \$543 (+14.5%). By comparison, the ADR for hotels was \$398 in July 2026. It is important to note that unlike hotels, units in vacation rentals are not necessarily available year-round or each day of the month and often accommodate a larger number of guests than traditional hotel rooms.

The data in DBEDT's Hawai'i Vacation Rental Performance Report specifically excludes units reported in DBEDT's Hawai'i Hotel Performance Report and Hawai'i Timeshare Quarterly Survey Report. A vacation rental is defined as the use of a rental house, condominium unit, private room in a private home, or shared room/space in a private home. This report does not determine or differentiate between units that are permitted or unpermitted. The legality of any given vacation rental unit is determined on a county basis.

Island Highlights

In July 2026, Maui County had the largest vacation rental supply at 298,300 available unit nights (+0.3%). Unit demand was 157,200 unit nights (+10.1%), resulting in 52.7 percent occupancy (+4.7 percentage points) and ADR at \$679 (+23.2%). For July 2026, Maui County hotels reported ADR at \$579 and occupancy of 73.7 percent.

O'ahu vacation rental supply was 210,100 available unit nights (-12.8%). Unit demand was 138,900 unit nights (+2.1%), resulting in 66.1 percent occupancy (+9.7 percentage points) with ADR at \$427 (+1.9%). In comparison, O'ahu hotels reported ADR at \$307 and occupancy of 87.8 percent for July 2026.

The island of Hawai'i vacation rental supply was 215,600 available unit nights (-5.9%) in July. Unit demand was 95,500 unit nights (-4.9%), resulting in 44.3 percent occupancy (+0.5 percentage points) with ADR at \$423 (+10.7%). Hawai'i Island hotels reported ADR at \$489 and occupancy of 71.0 percent.

Kaua'i had the fewest number of available vacation rental unit nights in July at 135,400 (-12.3%). Unit demand was 80,300 unit nights (-2.2%), resulting in 59.3 percent

occupancy (+6.1 percentage points) with ADR at \$621 (+13.7%). Kaua'i hotels reported ADR at \$468 and occupancy of 79.7 percent.

About the Hawai'i Vacation Rental Performance Report

The Hawai'i Vacation Rental Performance Report is produced using data compiled by Lighthouse Intelligence, Ltd. (formerly known as Transparent Intelligence, Inc.), which was selected by DBEDT as the provider for these data services.

The report includes data for properties that are listed on Airbnb, Booking.com, Vrbo and TripAdvisor. Data for units included in DBEDT's Hawai'i Hotel Performance Report and Hawai'i Timeshare Quarterly Report have been excluded from the Hawai'i Vacation Rental Performance Report. This report also does not determine or differentiate between units that are permitted or unpermitted. The legality of any given vacation rental unit is determined on a county basis. DBEDT does not support illegal vacation rentals.

Lighthouse enriches their occupancy and price calculations with reservation data provided by vacation rental software providers, online travel agencies and local property managers. Note on Pricing Methodology: to reflect recent changes in industry standards, Lighthouse is now reporting vacation rental prices using the 'Total Rate' metric. This metric represents a single price that includes all additional fees and costs (such as cleaning or service fees). To ensure data comparability, all historical data from January 1, 2019, has been reprocessed under this new methodology.

In July 2026, Lighthouse rolled out a major upgrade to its STR cross-listing algorithm, introducing an AI-powered methodology that improves the accuracy of property deduplication across all tracked platforms, including smarter handling of Airbnb listings and more granular unit-level tracking on Booking.com. As part of this update, historical data has been restated from January 2026 to align with the new methodology. Any shifts in supply figures reflect greater precision in the data, not changes in the market itself.

Currently, the reservation systems data provided by data partners represent about 37.3 percent of the estimated total unique vacation rental properties in the State of Hawai'i. On a county level, reservation system data represents 31.5 percent of Maui County coverage; 43.4 percent of Honolulu County coverage; 39.0 percent of Hawai'i County coverage; and 35.6 percent of Kaua'i County coverage of the estimated number of unique vacation rental properties.

For July 2026, the report included data for 35,243 units, representing 60,443 bedrooms in the Hawaiian Islands.
